EDUCATION

BE - Computer Science (2019-2023)

KLN College of Information Technology

Sivagangai | CGPA-7.6/10

PROFILE SUMMARY

Experienced MERN Stack Developer skilled in building scalable web applications with React, Node.js, Express, and MongoDB. Proficient in front-end and back-end development, RESTful APIs, authentication, and cloud deployment. Passionate about clean code, problem-solving, and delivering high-quality software solutions.

Work Experience

Working as MERN full stack developer in Why Global Services from Sep 2024 to Mar 2025.

- Developed and deployed full-stack web applications using React, Node.js, Express, and MongoDB.
- Implemented RESTful APIs, authentication, and database management for scalable solutions.
- Designed responsive UI/UX with optimized performance and interactive user experiences.

SKILLS

Programming Languages: JavaScript (ES6+), Java (OOPs)

Frontend Development: React.js, Redux, HTML5, CSS3, Bootstrap, Tailwind CSS, Figma

Back-end Development: Node.js, Express.js, Restful API s, JWT Authentication, MVC Architecture

Databases & Storage: MongoDB

Version Control & Tools: Git, GitHub, Postman, VS Code, Netlify, Render, IBM Cloud Deployment

PROJECTS

Project Tittle: Integrated Food Ordering and Delivery System

Project Description:

Developed a full-stack food ordering and delivery system with real-time order tracking, secure payment processing, and a responsive UI using the MERN stack, Redux, Firebase, and Stripe API. The system enables users to browse restaurants, place orders, and track deliveries seamlessly.

Responsibilities:

- Developed a **responsive food ordering platform** using **React.js, Redux, Bootstrap, and Tailwind CSS** for seamless user experience.
- Designed and implemented **secure RESTful APIs** with **Node.js, Express.js, and MongoDB** for authentication, order management, and data processing.

Environment:

React.js, Redux, Node.js, Express.js, MongoDB, Firebase, Stripe API, Bootstrap, Tailwind CSS, JWT, Git, Netlify.

Project Title: Crowdfunding Platform

Project Description:

Developed a full-stack crowdfunding platform enabling users to create, manage, and support fundraising campaigns. Built a responsive UI with React.js and implemented secure back-end operations using Node.js and Express.js.

Responsibilities:

- Designed and developed a **responsive crowdfunding platform** using **React.js, Redux, Bootstrap, and Tailwind CSS** for an engaging user experience.
- Implemented a **secure back-end with Node.js, Express.js, and MongoDB**, handling **authentication, campaign creation, and transaction processing**.
- Integrated **Stripe API for secure donation processing** and **Firebase for real-time updates and seamless data synchronization**.

Environment:

-React.js, Redux, Node.js, Express.js, MongoDB, Firebase, Stripe API, Bootstrap, Tailwind CSS, JWT, Git, Netlify, Render.

Project Title: IBM University Projects – Resume Management System Using Flask

Project Description:

The Resume Management System is a web-based application built with Flask as the back-end and HTML, CSS, and JavaScript for the front-end. It allows users to upload, view, and download their resumes in PDF format. The project focuses on file handling, responsive design, and creating an interactive user interface.

Responsibilities:

- Designed and developed responsive user interfaces using Python, HTML, CSS, and JavaScript for an optimized user experience.
- Implemented interactive forms with validations for seamless resume uploads and downloads.
- Developed secure back-end functionality using Flask to handle routing, file management, and server-side logic.

Environment:

- HTML, CSS, JavaScript, Python, VS Code, and Local-host for deployment
